

Kuresh Garbada

Dahod, Gujarat – 389151, India | kureshgarbada@gmail.com | +91-9408256972 | LinkedIn | GitHub

Objective

Computer Engineering undergraduate with hands-on experience building full-stack web applications. Comfortable with core concepts like OOP, Collections, and exception handling, and genuinely curious about writing clean, well-structured code. Looking to join a team where I can contribute, learn from real problems, and grow as a developer.

Education

Charotar University Of Science And Technology

Bachelor of Technology in Computer Engineering – **GPA: 9.33**

Anand, Gujarat, India

July 2023 – May 2027

Little Flower School (GSHSEB)

Higher Secondary Education (Science)

Dahod, Gujarat, India

Mar 2023

Burhani English Medium School (GSEB)

Secondary School Certificate

Dahod, Gujarat, India

May 2021

Technical Skills

Languages	: Java, C++, C
Core Java	: OOP, Collections Framework, Exception Handling
Databases	: MySQL, MongoDB
Web Technologies	: HTML, CSS, JavaScript
Frameworks	: React.js, Node.js, Express.js,
Tools	: Git, GitHub, VS Code

Projects

CloudLens – Cloud Cost Optimization Platform *React, TypeScript, Node.js, Express, PostgreSQL, Prisma* GitHub | Live Demo

- Built a full-stack cloud cost optimization platform that monitors cloud spending, flags resource waste, and auto-generates cost-saving recommendations.
- Designed a PostgreSQL schema using **Prisma ORM**, hosted on Neon serverless Postgres for autoscaling and low-latency queries.
- Built RESTful APIs with **Node.js**, **Express**, and **TypeScript** for teams, resources, cost aggregation, and recommendation lifecycle management (apply/dismiss/reopen).
- Developed a responsive **React** (Vite + TypeScript) dashboard with **Tailwind CSS** and **Recharts** for interactive cost analytics
- Deployed the frontend on **Vercel** and backend on **Render**, with CORS-enabled cross-origin communication between services.

CrewChat – Real-Time Chat Application *React.js, Node.js, Express.js, MongoDB, Socket.IO, JWT, Cloudinary, Tailwind CSS* GitHub

- Built a full-stack real-time chat application using **React.js**, **Node.js**, and **Express.js**, enabling secure one-to-one messaging via **Socket.IO**.
- Designed a **MongoDB** schema using **Mongoose** to model users, conversations, and messages, supporting chat history retrieval and online/offline status tracking.
- Implemented authentication using **JWT** and **bcrypt.js** password hashing, with protected API routes and **Cloudinary** image upload for media sharing.
- Developed a responsive UI with **React** and **Tailwind CSS** reflecting live online status and real-time message updates without page reloads.

Certifications

- NPTEL Elite Certification – Data Structures and Algorithms using Java
- 3rd Place – College Hackathon | Built CertifyChain, a blockchain-based platform for secure certificate issuance and verification
